Luxuries Once But Necessities Now

PRACTICALLY any Canadian citizen may own today an automobile, the possessing elements of history, style, comfort and efficiency which no amount of wealth could have commanded a dozen years ago.

For the automobile industry has outgrown its original function as a supplier of transportation, and has in an amazingly short time, brought about the refinements which are exemplified in the present-day General Motors car.

Since its foundations first were laid sixty years ago, this institution has believed that every Canadian has a right to the best his country produces, a right to satisfy his sense

of beauty, his desire for comfort, his need for dependability. General Motors has at its command the master minds of the industry. It has the finest automotive research laboratories and the greatest artists and designers in the world. And General Motors has used its property and success unhesitatingly in improving the quality and increasing the value of its products.

It is thus that General Motors has made the automobile a necessity in the modern world.

Imported Alfalfa Seed Must Be Red

On the recommendation of the advisory seed board, the minister of agriculture, Ottawa, has amended the regulations under the Seed Act to prohibit the importation into Canada of alfalfa seed, or any mix of seed containing ten per cent or more of alfalfa seed, unless ten per cent of the seed in such container is coloured red. This action was taken to discourage the importation of southern-grown alfalfa seed, which is not satisfactory in Canada but which is plentiful in quantity together with our acclimated alfalfa varieties and destroy their winter-hardy qualities.

Alfalfa gave a short seed crop in Canada this year because of unfavorable conditions. But with the carrying over of 1926 seed, this year's seed crop is estimated to be quite good for our seedling requirements. Canadian alfalfa seed has become popular in the United States and in other countries of Northern Europe. Very little, if any, should be exported this year, and farmers would be well advised to obtain their alfalfa seed supplies early in the season. Those who purchase imported alfalfa seed should satisfy themselves that it is adapted to our conditions.

D.W.I. Concert and Dance

On Friday last, November 25th, the Ladies' Auxiliary of the Delia Women's Institute, a most successful entertainment and dance was held in the Empire Theatre.

The first evening was a concert and entertainment, with Mr. N. Burke composing the choir. After the singing of "O Canada," the Delia Drama Society, under the leadership of Mr. Springfield presented an amusing little sketch, "School Days." This was followed by a quartet by Mr. and Mrs. B. S. Newcombe. Mr. and Mrs. Newcombe are always popular with Delia audiences, and their recent number was that of "Fanny."

"Come to the Fair," Miss Walworth's orchestra, consisting of Miss Walker, Rosalind, Buckley, Simpson, etc., then gave a selection which also received a ovation.

The next item was a monologue, entitled "St. John," very ably rendered by Mrs. F. F. Unger, followed by a dance, "The Flying Swan," by Keweenaw Walker.

Mrs. Burke and Mrs. Gardiner gave a new rendition of "The Irish Washerwoman," after which Mr. Newcombe again delighted everyone with his song, "The Bigger."

The kitchen orchestra, a number of kitchen utensils transformed into musical instruments, proved very amusing. Mrs. Burke showed her wit to be an able conductor, and Mrs. Newcombe's roudness only on the various number was truly an artistic performance.

Mrs. Hamilton and Mrs. Gardiner had prepared a dramatic sketch, "Maggie and Jiggs," but owing to the recent death of her brother-in-law Mrs. Hamilton did not feel equal to taking the part, and we are asked to hope that she, the announcement of this fact was an inadvertence.

The rest of the evening was given over to dancing to the strains of Specian's orchestra. Lunch was served by the ladies, and everyone reported having a real good time.

The exception is in the North Calgary pool districts where the retiring director has gone to London, England, with D. L. Directors re-elected were: Edmonton, George Bennett; Canmore, Law Haldimand; Red Deer, H. W. Wood; South Calgary, Ben Pinner; Carletonville, J. J. Strang; and Lethbridge, C. Jensen.

E. A. MacPherson is on his way
to London, England, to supervise
the opening of the London agency
of the Canadian National P.O. He
is accompanied by D. L. Smith, of
Winnipeg, who has recently been
appointed manager of the new office.
Mr. MacPherson will be in London
for a short time only.

The annual church recently held
in the annex of the Ladies' Aid was
an unusual, very successful considering
the small number of people present.
It was well patronized by people from both
town and country. The loathe were
very attractive in the red, white and
blue decorations, and the singing
handicrafts in the fancy work
loath added much to the display.

A splendid chicken dinner was
served in the annex, which was
decorated in mauve and yellow. The
table was L. shaped, and looked
pretty with the bands of yellow and
mauve crepe paper and vases of cut
flowers. The fish pond was a new
addition this year, and offered a
continuous source of amusement to
the young people. The total pro-
ceeds amounted to \$229.45, made
up as follows:—Tea-room, \$60.50;
Breads, \$12.05; Candy, \$33.45;
Donations, \$5.00; Fish Pond, \$24.45;
and Fancy-work and aprons, \$123.90.

23 YEARS OF PUBLIC PREFERENCE

The NEW CAR

ALL that engineers have learned,
all that millions of owners have
experienced in nearly a quarter of a
century, have made possible this car
which is today as far ahead of its time
as was the famous Model T in 1908.

Sixteen million automobiles, spring
their owners in jungle and desert, on
mountain and plain, on boulevard and
highway, were the test cars that have
made this new automobile possible.
Its advent marks a new epoch in au-
tomotive engineering in point of inheri-
tance—quality—mechanical design.
Lavish use of the finer metals, precision
in delicate machining processes.

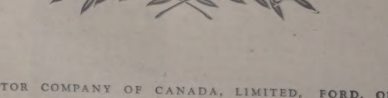

Nowhere in its construction has there
